**Databases :** MongoDB, Mongoose ODM, Postgres, MySQL, SQLite, Sequelize ORM

**SDLC :** Agile / Scrum, BDD TDD, Waterfall

**DevOps :** CI / CD , OneOps ,Jenkins

**Testing :** Jest ,Enzyme

**Project - management :** Jira / Confluence , Slack

## EXPERIENCE

### Front End Developer

Walmart eCommerce — *Sunnyvale, California* ( Contract )

March 2020 - PRESENT

- Collaborate with product team members to implement new features maintaining microservices architecture principles.
- Work closely with UX designers to translate visual designs into responsive user interface components.
- Used Jenkins for continuous integration and continuous deployment (CI/CD).
- Design responsive UI using Material UI, React-Motion, and other tools.
- Worked with IAM for authentication and authorization of users.
- Used Charles and chrome developer tools to debug.
- Worked with state management libraries like Redux and Formik.
- Building stable and maintainable codebase using react.
- Maintain, analyze, and enhance existing services.

### Software Developer

Eritrean Railway — *Asmara, Eritrea* ( Full -Time )

January 2015 - March 2019 ,

- Building and maintaining human resource management software for internal use.
- Worked on server-side web applications using Node.js and involved in Construction of UI using JQuery, ReactJS, Ext JS, Bootstrap and JavaScript.
- Evolve software engineering best practices to ensure a high standard of quality for all team deliverables.
- Implement, test, and maintain a new payroll tracking software for employees.
- Analyze and improve efficiency, scalability, and stability of various system resources.
- Conduct design and code reviews.

## EDUCATION

**Eritrea Institute of Technology** – Bachelor's Degree in Computer Science

July 2014

- Graduated with high academy remarks (GPA : 3.81 / 4.0 )

## AWARDS

- ZAGRE Presidential award
